SKILLS

- **Languages:** C++, Python, C, Java, DSA
- **ML/AI:** Supervised Learning, Unsupervised Learning, Reinforcement Learning, Neural Networks, NLP
- **Frameworks & Libraries:** PyTorch, Scikit-Learn, NumPy, Pandas, Matplotlib, Seaborn,
- **Developer Tools:** Git, GitHub, Jupyter Notebook, VS Code, Google Colab, Antigravity
- **Frontend/Other:** HTML, CSS, JavaScript, Tailwind CSS, FlutterFlow, Kotlin
- **Soft Skills:** Analytical Thinking, Leadership, Problem-Solving, Communication, Collaboration

PROJECTS

- **Transliteration Consistency of Names Across Scripts | [GitHub](#)** Dec'25-Jan'26
 - Architected a multi-modal transliteration verification system to ensure pronunciation preserving and structurally correct transliterations across scripts (English ↔ Hindi).
 - Constructed a hybrid arbitration pipeline combining a neural seq2seq transliteration model and a phoneme-to-grapheme (G2P/P2G) system, achieving **49%** char-level accuracy.
 - Integrated post-generation validation to detect and correct over-generation, under-generation, repetition artifacts, and invalid phonetic endings improving transliteration reliability.
 - **Tech:** Python, PyTorch (Seq2Seq), g2p_en, Random Forest
- **Patient Segmentation System | [GitHub](#) | [Live](#)** Nov'25-Dec'25
 - Assembled an end-to-end healthcare analytics system using UMAP + KMeans algorithms to segment **9800+** patients into **9** clinically meaningful risk clusters from NHANES data.
 - Formulated a Reinforcement Learning (Q-learning) – based recommendation system engine to map each patient segment to optimal preventive health actions.
 - Engineered and deployed an interactive Streamlit dashboard with personalized recommendations, cluster visualizations.
 - **Tech:** Python, Scikit-learn, Pandas, Numpy, Matplotlib, Plotly, Streamlit, UMAP-learn, KMeans Clustering, Q-Learning
- **ML System for BIOG datasets | [GitHub](#)** Feb'25-Apr'25
 - Evaluated and compared classical time-series and machine learning models using cross-validation and error metrics (RMSE, MAE) to select the best performing approach.
 - Devised an end-to-end demand forecasting system using Random Forest, XGBoost and ARIMA models on Blinkit's e-commerce dataset achieving upto **89%** model accuracy.
 - Erected interactive dashboard using Streamlit and Plotly for visualizing predictions, customer segmentation and delivery performance analysis.
 - **Tech:** Python, Streamlit, Pandas, Numpy, Matplotlib, Plotly, Scikit-learn, Seaborn

CERTIFICATES

- Prompt Design in Vertex AI | [credly](#) Aug'25
- Fundamentals of Network Communications | [coursera](#) Sept'24
- The Bits and Bytes of Computer Networking | [coursera](#) Sept'24
- Foundations: Data, Data, Everywhere | [coursera](#) May'23
- Ask Questions to Make Data-Driven Decisions | [coursera](#) May'23

ACHIEVEMENTS

- **Secured Global Rank under 500k** Dec'25
 - Solved 500 DSA problems across platforms (LeetCode, GeeksForGeeks) achieving a global rank.
- **Selected as SAP Student Coordinator** Feb'25
 - Selected through a competitive interview among 50+ students as SAP Student Coordinator

EDUCATION

- **Lovely Professional University** Punjab, India
Bachelor of Technology - Computer Science and Engineering; **CGPA: 8.78** Aug'23-Present
- **Sri Guru Harkrishan Senior Secondary Public School** Amritsar, Punjab
Intermediate; **Percentage: 94.6%** Apr'21-Mar'23
- **Sri Guru Harkrishan Senior Secondary Public School** Amritsar, Punjab
Matriculation; **Percentage: 95.2%** Apr'20-Mar'21
